

# Britannia 2000 Limited

Designers, Manufacturers & Integrators of Specialist  
Surveillance Systems and Equipment

# Cyclops Mk4D

Small Remotely Operated Vehicle

## Features

- Compact and Lightweight
- 2 Metre Extendible Boom
- Pan and Tilt Head
- Cantilevered Track System
- Radio and Fibre Optic Control
- Colour and Black/White Camera
- Spot Light
- Rapid Rechargeable Lithium Ion Battery
- Proportional Joystick Control
- Various Wheel Kits

## Description

The Cyclops has been developed for the use in Improvised Explosive Device Disposal (IEDD) high-risk search and remote operation in hazardous urban environments. Now with the addition of the "Big Wheel" kit this role is extended to allow use in semi rural/off road terrain.

## Applications

- ✦ Bomb disposal
- ✦ Explosive Ordnance Reconnaissance
- ✦ Checking suspicious cars and packages
- ✦ Collecting evidence for forensic test
- ✦ Communications, search and surveillance
- ✦ Nuclear De-Commission
- ✦ Hostage/Siege Remote Surveillance Platform
- ✦ Airfield EOD

## Options

- ✦ Additional cameras (4 video channels max)
- ✦ Various wheel styles to suit terrain
- ✦ Hand held controller with video glasses
- ✦ "Fuel Gauge" on vehicle battery to show battery status (standard)
- ✦ Brackets to allow fitting of shot gun or other small arms
- ✦ X-Ray systems
- ✦ Chemical Agent Monitor systems
- ✦ Explosive "sniffer" systems
- ✦ Video overlay to display sensor information on display screen
- ✦ Mains power adaptor (110/220V AC) for Compact Base Station
- ✦ 12V DC adaptor for cars to Compact Base Station
