- Visible In Daylight
- Durable 6061 T6 Aluminium Housing with Anodised Finish
- Easy Adjustment for Windage and Elevation
- CR123A Battery Operates for 4 Hours
- Wide Range of Mounts and Switches

### Description

The GreenBeam is the most innovative of the laser gun sights available of today. This is the first of the laser gun sight manufactured with a green laser beam. The green in the GreenBeam 200 says it all: this colour is one of the most sensitive to the human eye. The 532nm green laser diode, along with exceptional glass optics, produces a 1 mile night time range and is even visible in broad daylight. It is 20 times brighter than read laser gun sights, making it far more superior. The GreenBeam 2000 also out performs other green laser gun sights in a smaller, more affordable unit. The dot size is smaller than 1.75" precision dot at 100 yards. It is also easily adjusted with windage and elevation adjustment screws that are slotted for adjustment with a coin or a screwdriver. The GreenBeam 2000 delivers unmatched target acquisition anytime, all the time

### Specifications

<b>Available Colour:</b>	Black and silver
<b>Weight:</b>	85g
<b>Power:</b>	3v lithium battery, CR123A
<b>Wavelength:</b>	532nm
<b>Laser:</b>	Class IIIa, CW mode
<b>Operation:</b>	Finger pressure switch (removable)
<b>Size:</b>	100mm x 19mm diameter
<b>Material:</b>	Aluminium 6061 T6
<b>Duration:</b>	4 hrs continuous ON
<b>Range:</b>	1600m (1 mile) at night
<b>Windage Adj:</b>	30m at 100m
