

# Helmet Cameras

## A Range of Helmet Cameras with Microwave Video & Audio Transmission

**Colour camera complete with microphone**  
Housing made of carbon fibre

**Standard police riot helmet**  
Shown fitted with a miniature colour camera and microphone. 200mW video/audio transmitter built in the helmet. Antenna installed in the neck protector.

**Modular helmet camera system**  
Shown with intensified camera and in line coupled 200mW video transmitter. Viewing through Virtual Reality Glasses. Thermal imager version available

**Side mounted and internal cameras for fire fighting**  
Thermal Imager options, with through building video/audio transmission

**Side mounted camera & weapon cameras for SWAT teams**  
Special Forces, Customs etc, with recording and transmission

**Britannia 2000** designs and manufactures a wide range of helmet mounted cameras either fitted internally to the helmet or on purpose made brackets. The cameras can be fitted with video/audio transmitters complete with a miniature microphone.

Video transmission options include the standard Britannia engineered analogue microwave or the new **BritLink R1000** digital COFDM system (please see separate datasheet for a full description). **BritLink R1000** is designed to be effective in urban and non line-of-sight applications, where analogue systems may have very poor range performance.
