

## 2663 Wiper

### Features

- Small Housing
- Ruggedised
- 12v or 24v Versions
- Closed Relay Operation
- Fits Directly onto 2553 Camera
- Sealed to IP66

### Description

Built into rugged aluminium housings milled out from solid, both the 2663 and 2698 wiper units are suitable for low maintenance military environments. Currently used on border surveillance cameras, the 2698 has a high torque motor powerful enough for large wiper blades. For OEM applications, the angle of sweep and blade length can be set according to customer specification. The wipers can also be used on fighting vehicles' vision blocks.

The smaller 2663 wiper, is also milled out of a strong solid piece of aluminium, and is suitable for applications where weight is an important issue, such as the HeliCam system designed by Britannia 2000 Ltd.

## 2698 Wiper

### Features

- High Torque
- Ruggedised
- 12v or 24v Versions
- Closed Relay Operation
- Sealed to IP66

### Options

- Rubber wiper blade for water or brush for dust
- 12v or 24v DC
- Custom set sweep angles

### Accessories

- Washer units and corresponding reservoirs
